

NEW

MIDLAND CT 210/410

The top seller in the range of amateur VHF/UHF

The **CT210** and **CT410** are two handheld transceivers, operating respectively on VHF and UHF frequency bands. Incorporating the latest in design, these new radios are very small and compact, but also benefit from a complete alpha-numeric keyboard. All this and on top of a huge range of extra features puts the CT range of radios at the top of their class.
